

## NEW EASY ENTRANCE KEY PLUG ON EURO-PROFILE CYLINDERS

SERIES 120 E 120 H

### OUR STRENGTHS

The new easy entrance key plug, now standard on all OMEC cylinders, allows a much easier insert and rotation of the key and prevents the key breaking. Stainless steel pins and drivers and phosphore bronze springs ensure a high corrosion resistance (salt spray tested 96 h) and a high durability (more than 100.000 cycles). Drivers are picklock resistant.

### 100% MADE IN ITALY AND UNI EN TESTED

Like all OMEC products, 120 Euro-profile cylinders are exclusively made in Italy and are designed and tested according to UNI EN 1303:2015 European standard.
